

Helen Joseph Hospital

This acute adult regional hospital is situated in Auckland Park, Johannesburg (Right next to UJ). The hospital has approximately 700 beds with medical, surgical, orthopedic and psychiatric wards.

We predominantly see patients with CVA and dysphagia. Our patient load also includes patients with aphasia and head injury as well as psychiatric patients.

The department is situated in the OPD specialist clinic next door to ENT. We are separate from the other Allied departments. There is 1 office, 1 therapy room and 1 audio booth. We have all the necessary equipment except diagnostic OAE's and ABR (for which we refer out).

There is a Head of Department and currently 3 community service therapists.

Amenities at our hospital includes

- Tennis and netball courts
- Helicopter pad
- Cafeteria
- Snack lady
- Hospital management is considering opening a staff gym

It is great to work in this hospital because we work in conjunction with the ENT department. We often go and observe surgery as well! It is a great hospital if you love working with adults. We also work well with the other allied departments.
