

Kalafong Hospital

Kalafong hospital is situated 12km west of the city central of Pretoria and 65km from Johannesburg central. It's been in existence since 1973. It is a regional hospital that houses 28 wards. In addition, the hospital has a number of facilities available as well as a full team of allied professionals.

The hospital currently has both Speech-Language and Audiology equipment available. These include both screening and diagnostic testing equipment, such as an OAE & ABR screener, otoscope, tympanometer, sound proof booth, audiometer (including VRA), Hi-pro, diagnostic ABR, earmould drilling equipment, informal and formal speech assessment tools (e.g. WAB, TACL) and therapy equipment.

The Speech-Language therapist and Audiologist provides the following services within the hospital: hearing screening & diagnostic testing of pediatric and adult patients, hearing aid programming, fitting and orientation to pediatric and adult patients, ABR testing, aural rehabilitation, early intervention services provided to children from birth-6 years, assessment and intervention of adult patients suffering from communication and speech difficulties, assessment and intervention provided to ward patients, dysphagia assessment and intervention

Working at Kalafong hospital offers various opportunities!

You work with both adult and paediatric population, in both speech therapy and audiology, are involved with student training, are a part of an allied team (Occupational therapist, Physiotherapist and Dietician), participate and interact with doctors in the ENT and High-risk clinics and get to participate in a fully developed KMC ward.
