

# Zola Community Health Centre

Zola CHC is situated 30km from Johannesburg CBD

Zola Clinic is situated in Zola, Soweto and falls within Region A in the Johannesburg Metro Health District. The Speech Therapist works within a multidisciplinary team (The Rehab Team) which includes an Occupational Therapist, Physiotherapist, OT Assistant and Physio Assistant. The speech therapist provides therapy to children and adults with a variety of problems including: speech and language problems, feeding and swallowing problems, stroke, TBI, CP, articulation problems as well as stuttering and many other disorders. Although there is no diagnostic audiology, audio screening is conducted and hearing aids are fitted at the clinic. Various groups such as language stimulation, CP, stroke and others are run as well.

Within the clinic setting, there is a lot of outreach work to the various old aged homes, crèches and stimulation centres in the area, as well as other smaller clinics. Home visits are also conducted for patients who are unable to attend the clinic. Working within a multidisciplinary team everyday ensures that the patient is seen holistically and is given the best possible treatment. The speech therapist also gains knowledge about the other fields. At a clinic level, the speech therapist is also involved in various promotion and prevention campaigns throughout the year.
